

Cyber Security | Cloud Transformation
 Artificial Intelligence | Data Analytics

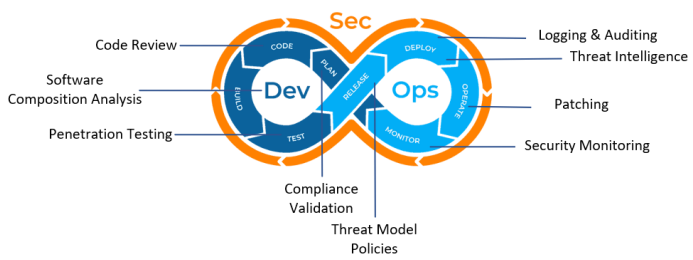

CAPABILITY STATEMENT

Mission Statement: To help our clients protect their most critical assets and securely deliver their objectives.

OUR APPROACH

At Stratez, we specialize in supporting our Federal Government customers with their Cloud Transformation journey while protecting their critical assets from cyber attacks and data breaches. Our methodical, proven approach is specifically tailored to our customer’s needs, following these key tenets:

-  Cyber strategy & compliance validation
-  Policy Configuration
-  Architecture Enablement
-  Security Assessment
-  Penetration testing
-  Security monitoring

KEY DIFFERENTIATORS

- ❖ Small Business Certifications (**EDB, WOSB**)
- ❖ **25+** passionate, “outside-the-box thinker” employees
- ❖ Large repository of Intellectual Capital with cyber-security prototypes that can be tailored easily to different client needs
- ❖ Hands-on training program in our multi-cloud Innovation Lab
- ❖ People focused, boutique cloud transformation, artificial intelligence and cyber security company

PAST PERFORMANCE

- ❖ IRS cloud access security broker engineering
- ❖ IRS external gateway and trusted gateway architecture
- ❖ API infrastructure security – Design OATH 2.0 based authentication gateway and authorization gateway
